

## Run Shell Script

Shell:

Pass input:

```
showFiles="$(defaults read com.apple.finder AppleShowAllFiles)"
if [ "$showFiles" = 1 ]
then defaults write com.apple.finder AppleShowAllFiles -bool FALSE
else defaults write com.apple.finder AppleShowAllFiles -bool TRUE
fi
```

Results Options Description

## Run AppleScript

```
try
tell application "Finder" to quit
on error
-- Note that the error line below is shown on two lines
-- (in order to narrow the display here on macosxhints),
-- but must be entered as one line; just remove the line break
error "Unable to quit Finder. You may want to try force quitting it (Command-Option-Escape) to have the change take effect."
end try
set finderIsActive to false
set errorCount to 0
repeat until finderIsActive
try
```
